

BAG FILTER SHANGHAI

22nd Shanghai International Exhibition & Seminars on Bag Filter Technology & Equipment

November 26–28, 2025

SHANGHAIMART, Shanghai, P. R. CHINA

SHOW REPORT

Following us @BagFilterShanghai

www.BagFilter.net

The Leading Annual Event
for **BAG FILTER** Industry in China
ever since 2002

Opening Ceremony of the debut BAG FILTER event in 2002

HIGHLIGHTS

The 10th edition and the 17th edition were held with the biennial conference of the formal Bag Filter Technology Committee of CAEPI. This conference is deemed as China's national level for bag filter industry.

EXHIBITION

TOTAL EXHIBITORS NUMBER

200+ COMPANIES

COUNTRIES/REGIONS **25**

Searching for past exhibitors list:

CONFERENCE

TOPICS : **200+**

THEME CONFERENCE **12** SESSIONS

- Coal-fired Power Plant **4**
- Cement **4**
- Solid Waste Incineration **1**
- Failure Control **3**

GRAND OPENING of BAG FILTER Shanghai 2025

Mr. Liu Jingxian

Filter Test Center of Northeastern University;

Mr. Li Guiting

Chairman of HENAN SINOMA ENVIRONMENTAL PROTECTION CO., LTD.;

Mr. Liu Xuejun

Secretary-General of the Dust Control Committee of China Association of Environmental Protection Industry;

Mr. Zhu Desheng

Senior Expert in China's bag filter industry;

Mr. Yao Qun

Chairman of the Dust Control Committee of China Association of Environmental Protection Industry; Senior Expert in China's bag filter Industry;

Mr. Kuang Hong

Executive President of Shanghai Cement Industry Association;

Mr. Lv Weining

Former President of Guiyang Aluminium-Magnesium Design & Research Institute;

Mr. Shi Yong

Hefei Cement Research & Design Institute;

From left to right

Dust Control Committee of China Association of Environmental Protection Industry

Founded in 1984, the China Association of Environmental Protection Industry is China's national environmental association with nearly 3,000 members. The Dust Removal Professional Committee, formed by merging the former Bag Filter with Electrostatic Precipitation Committees, supports CAEPI in policy research, technology innovation, standards development, and industry statistics.

Filter Test Center of Northeastern University

China's only state-authorized national testing institute for filter media and accessories. The Center holds authoritative status in the industry and conducts mandatory, certification and arbitration testing for baghouse filter media. Equipped with proprietary high-precision testing instruments, it also performs fundamental research on dust removal technology and develops advanced filtration materials. Its clients include coal-fired power, steel, cement, waste-to-energy, high-speed rail, aviation and marine sectors.

Shanghai Cement Industry Association

Founded in 1985, SCTA has approximately 250 member companies covering cement production, distribution, R&D and equipment manufacturing across six provinces and one municipality. It assists the government in quality supervision and industry self-regulation, participates in formulating local cement-sector development plans, and serves as the core driving force for the healthy and sustainable development of Shanghai's cement industry.

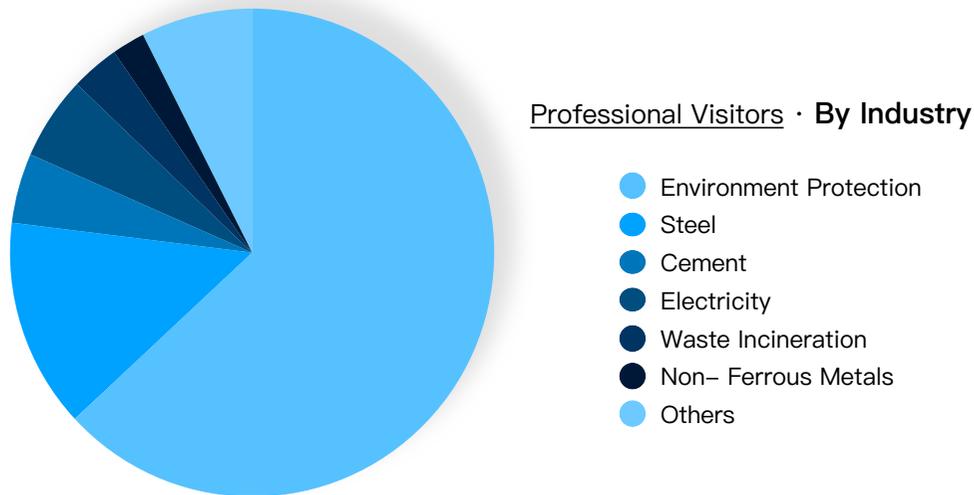

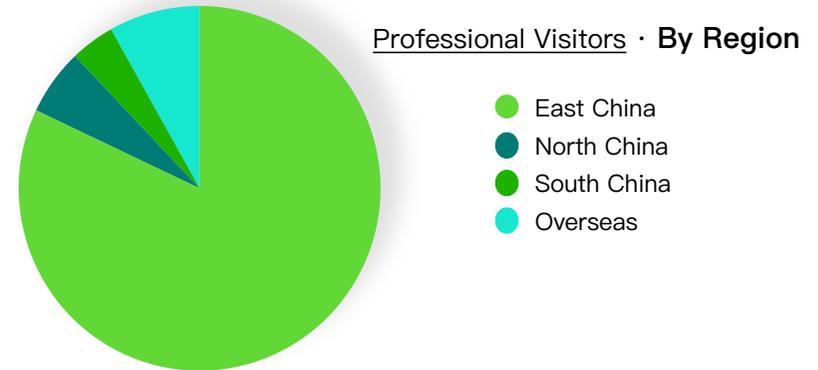

Guiyang Aluminium-Magnesium Design & Research Institute

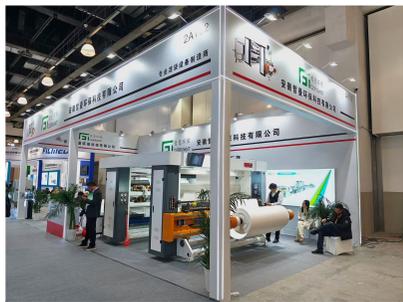

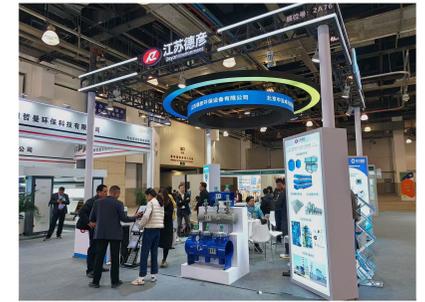

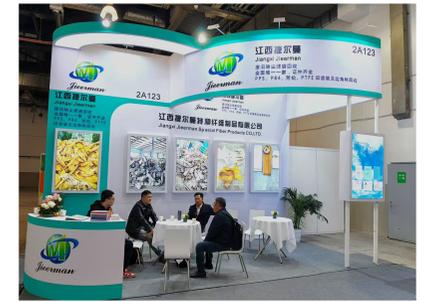

Established in 1958 and affiliated with China Aluminum Corporation (Chinalco), GAMI covers the full aluminium industry chain. As one of China's leading R&D institutes for light-metal smelting, it is also the authoritative institution for baghouse filtration technology in the aluminium electrolysis sector.

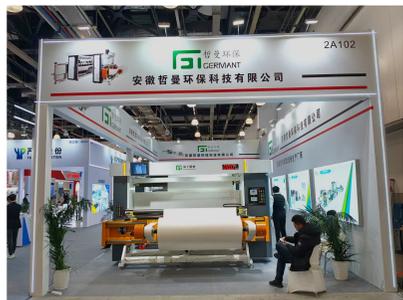

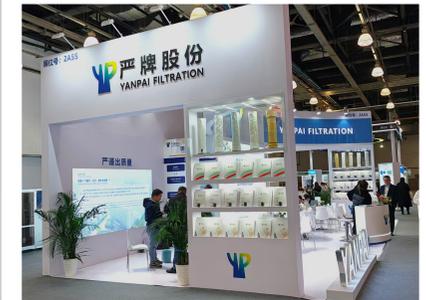

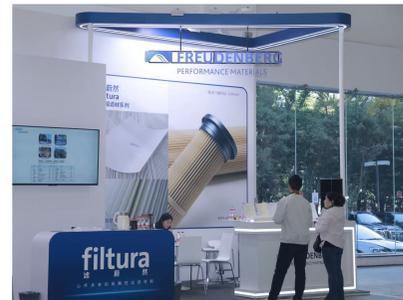

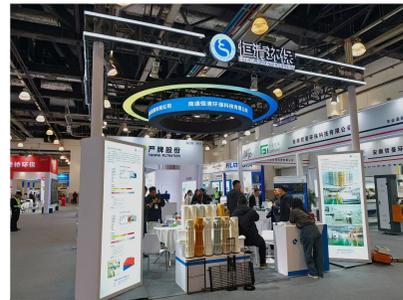

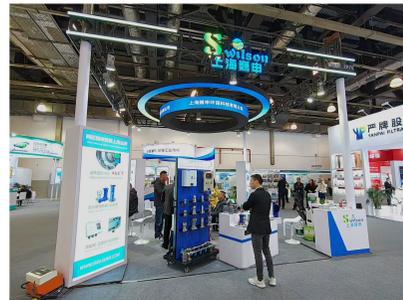

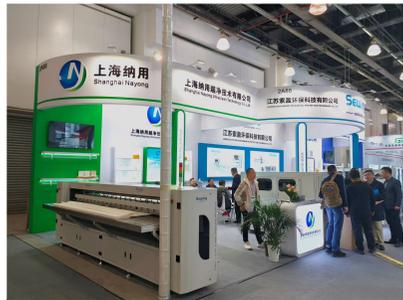

Hefei Cement Research & Design Institute

Founded in 1950, HCRDI is China's leading R&D and design institute in the cement industry. It holds a commanding position in dust control technology and standard-setting for the cement sector. As one of the earliest institutions in China's building materials industry dedicated to air pollution control, its environmental engineering arm leads the nation in baghouse dust collector technology development. Its solutions have successfully expanded from cement into metallurgy, power, chemical, coal, machinery and other industries.

BAG FILTER SHANGHAI 2025 successfully attracted experts, corporate representatives and technicians from the environmental protection and bag filter end-user industries both in China and overseas. Total visitors over the three-day event exceeded **3,532** visitors.

Conference on Enhancing New Quality Productivity in Dust Removal and Establishing New Paradigms for Pollution Reduction and Carbon Mitigation
